Reflector

Single Ended FIXTURE

This compact reflector for 315W SE CMH fixtures is a reflector optimized for stand-alone use. We recommend that these reflectors be replaced every year as dust and humidity can build up over time and cause the reflector to perform lower-than-optimal levels. Attempting to clean the reflector may damage the unit causing the reflectivity to be substantially less.

Changing your lamps and reflectors in a timely manner is the most cost-effective way to maximize the life and light from your fixture.

Physical Specifications

Length	262mm	10.31"
Width	253mm	9.96"
Height	110mm	4.33"
Weight	1kg	2.2lb

- ▶ German Aluminum material
- ▶ 96% Reflective
- ▶ Easy to install, no tools required
